Education

Vellore Institute of Technology B.Tech in Computer Science, CGPA: 9.21	2023–Present
Mount Litera Zee School, Goa AISSCE, CGPA: 8.73	2022–2023
Mount Litera Zee School, Goa AISSE, CGPA: 10.0	2020–2021

Experience

Python Developer Intern, CODESOFT

- Worked on Python-based automation tasks and real-world problem statements involving data handling and scripting.

Summer Intern, Siemens

- Contributed to industrial software workflows and data-driven tooling in a corporate engineering environment.

Core Member, Event Management (Anchoring) | StartUP Club

- Lead anchoring, event coordination, and on-stage operations for university-level events.

Lead of Operations Team, Music Club

- Managed logistics, team coordination, and execution of cultural and musical events.

Projects

Component Log Viewer

- Designed and implemented an automated PCB inspection tool, reducing manual analysis time by approximately 60%.
- Built an end-to-end pipeline for CSV/TXT logs with Excel-based model mapping and GUI visualization.
- Implemented color-coded PCB overlays, OCR-based GF extraction, and SQLite optimization supporting 50k+ records.

Technologies: Python, Tkinter, SQLite, pandas

ParXon – An App for Parkinson's Patients

- Developed a mobile application for Parkinson's patients (Stages 1–3) with guided exercise routines.
- Integrated voice assistance, medication reminders, Text-to-Speech, and speech recognition for accessibility.
- Research paper currently in progress in the healthcare technology domain.

Technologies: Java, Android Studio, Firebase, MySQL, PHPMyAdmin

Achievements

VIT Bhopal – Johns Hopkins Health Hackathon

Developed and presented a healthcare-focused prototype with a multidisciplinary team in the final round.

Interests

App Development | Web Development | Full Stack Development
Cloud Platforms: AWS

Technologies

Languages: Java, Python, JavaScript, SQL, HTML, CSS
Tools: Git, GitHub **Frameworks:** Node.js, Express (Basic), EJS
